VOL. 3.

MIDDLETON, NEW CASTLE COUNTY, DELAWARE, SATURDAY MORNING, APRIL 23, 1870.

NO. 17.

NEW STOVE, TIN, AND HOUSE-FURNISHING STORE.

THOMAS H. ROTHWELL'S

NEW BUILDING,
North Side of Main Street, 4 Buildings West
of Town Hall,

Middleton, Delaware.

Where he has constantly on hand, and is prepared to manufacture

ALL KINDS OF TIN WARE,
At Short Notice.

Particular attention paid to
ROOFING AND SPOUTING.
Orders respectfully solicited and promptly attended to.

COOK STOVES.
STAR, COTTAGE, NATIONAL,
CHARM, PRIZE, & VICTOR COOK.

PARLOR STOVES.
BOUQUET BASE, GAS, BURNING
BASE, DIAL, VIOLET, REVERE, UNION AIR-
TIGHT.

Stoves suitable for stores, offices, hotels, and school houses.

Orders will be received and promptly filled for any kind of Stove that may be ordered.

GALVANIZED, RUSSIA, AND SHEET IRON,
ZINC,

COAL HODS, SEIVES,
POKERS, SHOVELS,
TEA KETTLES, BAKE PANS, WAFFLE IRONS
SAD IRONS, BRASS & ENAMELLED
PRESERVING KETTLES,

ENAMELLED SAUCE PANS,
TEA BELLS, JAPANNED CHAMBER BUCKETS,
SPITTOONS, WAITERS, LANTERNS,

FLOUR AND PEPPER BOXES,
SAND CUPS, MATCH SAFES (Cast Iron),

MOLASSES CUPS,
PEACH CANS,
(Soldered and Self-Sealing)

PATENT CLOTHES FRAMES, &c. &c. &c.

Prompt attention to business, moderate prices, competent workmen, and a determination to please, may at all times be expected by those who may favor him with their custom.

THE VAPOR COOKING STOVE.
No Wood, no Coal, no Stove Pipe, no
Ashes, no Dirt, no Wood Boxes, no
Coal Scuttle, no Kindling Wood,

But a Friction Match,
And the fire in full blast in half a minute, oven hot in two minutes, steak broiled in seven minutes, bread baked in thirty minutes, the fire extinguished in a moment.

Please call and examine it in operation at
Thomas H. Rothwell's Stove Store,
MIDDLETON, DEL.

Sole owner of the stove for the State.
Feb. 19—y

BAUGH'S
RAW BONE
Super Phosphate of Lime.

TRADE MARK
SPRING 1870.

FARMERS,
INCREASE YOUR CROP OF
Corn, Oats, Potatoes, Wheat & Grass,
As well as add to the fertility of your soil, by a judicious and economical mode of
MANURING.

Get the value of your outlay the first season.
Obtain better filled ears and heavier grain.
Make your land permanently fertile.

Over sixteen years of constant use, on all crops, has proven that Baugh's Raw Bone Phosphate may be depended upon for every purpose.

Highly Improved and Standard Warranted.

For sale by agricultural dealers generally.

BAUGH & SONS,
MANUFACTURERS,
Office—No. 20 South Delaware Avenue,
PHILADELPHIA, PA.

march 12—6m

DELAWARE RAIL ROAD BONDS,
DELAWARE STATE BONDS,
NEW CASTLE CO. BONDS,
For Sale by GEO. INGRAM & CO.
Oct. 23—tf

WANTED, CITIZENS' NATIONAL BANK
STOCK. Highest market rates paid by
Oct. 23—tf GEO. W. INGRAM & CO.

WILMINGTON & READING R. R. BONDS
For sale by GEO. W. INGRAM & CO.
Oct. 23—tf Brokers.

FIRST Class Real Estate Bonds for sale by
GEO. W. INGRAM & CO.
Get 23—tf

CAPITALISTS are invited to call and examine
our list of Securities before investing.
Oct. 23—tf Geo. W. Ingram & Co.

HIDES AND TALLOW WANTED!
Steer Hides 8 cents. Bull Hides 6 cents.
Calf Skin 14 cents. Sheep Pelts 75 cents.
Tallow 10 cents.

The above prices will be paid at
Nov. 20—tf INGRAM & GIBSON'S.

Select Poetry.

From the Eastern Journal.

UNDER THE PEACH BLOSSOMS.

Under the blossoms at early dawn,
A maiden tripped from the dewy lawn,
A tangled heap of ruffled flower,
And grasses wet with April shower,
Lay 'neath the blooming bower.

Trickling, sprinkling through the crown
Of delicate blossoms, dripped down
Those pearl drops that gemmed each spray,
Till diamonds, sapphires and emeralds gay,
Amid the buds blushed-tinted lay.

The maiden passed beneath a tree
That spread its gorgeous canopy,
Till scarce the heaven was seen,
The waving branches and flowers awwen,
And the tremulous rain-drop's silver sheen.

And standing thus, the bowers amid,
I sprays and flower wands half hid,
She warbled low like a little lark,
Her love wail like an April day
Whose smiles see so fitful play.

A sudden sprinkle of rain and flower
About her descended, a lovely shower,
That, falling upon the curling hair,
Her snowy neck and forehead fair,
Did mingle pearls and blossoms there.

She looked above, mute with surprise,
But soft the love-light in her eyes,
When Allan from the branches sprang,
And loud his tones triumphant rang :
"Ah, ha! the finder's it must be,

What here is found beneath the tree,
On April Day, so folks agree."

One need no lovelier blossoms seek,
As blushes soft suffused her cheek
That rivaled in its colors sweet,
The rosy sprays that o'er her meet
And showed their tribute at her feet.

He took her hand within his own
And led her to the mossy stone
That served for seats, and as the fold
With shadow chased the braiding hair,
That new, old, tale was told.

What's she said, it was not may;
So nought remains for me to say;
But maidens, would you keep heart free,
Remember that you found not be
On All-Fool's Day, beneath the tree.

Descriptive Sketches.

Parish of St. Landry, Louisiana.

ITS CLIMATE, SOIL, PRODUCTION, PRICE OF
LAND, &c. &c.

Correspondence of the Middletown Transcript.

BAYOU CHICOT, LA.

March 31, 1870.

Editor of the Middletown Transcript:

Sir:—Enclosed I send you a pamphlet, published last year in this parish, for distribution, with the hope of calling the attention of those seeking new homes, to this part of Louisiana. Knowing the part of the country described in the pamphlet thoroughly, and all the persons who were concerned in the publication, I will say that the statements contained in it are generally correct, and I do not think that any thing has been too highly colored.

Whilst much arable land is found in this section, its great wealth consists in the timber. And its adaptedness to the rearing of sheep. This latter branch of industry could be carried on with great success, and upon a large scale. The third district comprises that portion south of the above, to the line separating St. Landry from Vermillion and Lafayette.

In its main features it is unlike the other two districts. The land is gently undulating, with an inclination towards the Gulf of Mexico; diversified with stream and prairie, dotted with small farms, and sustaining immense herds of cattle. This is the main agricultural portion of the parish, and the centre of all its commercial operations.

The chief shipping point, Washington, is within its limits, also the town of Opelousas, the seat of Justice. The lands of the two latter districts are 35 feet above overflow.

The Atchafalaya river on the east connects this parish by steamboat navigation with New Orleans. The Bayou Courtaleau, formed by the junction of the Crocodile and Beaufort affords good navigation to Washington the entire year, with slight and occasional interruption during the summer. The route is, down the Courtaleau to the Atchafalaya, thence up the latter to the Mississippi river, and thence to the city.

The Bayou Beaufort is the channel of transportation for the planter, by means of barges, to Washington; and the Crocodile affords means of transportation to the lumbermen. The Plaquemine Brulee, the Mallet, the Cane and Nezque, are fine streams, but not navigable. The Mermiteau, formed by the Nezque, Cane, and Plaquemine Brulee, is a fine navigable stream; vessels ascend it some 70 miles for lumber, which is taken to Texas, Havana and the Mexican ports.

The soil of the middle and southern division of the parish, is fair; being vegetable mould, with a small admixture of sand, super-imposed upon a bed of fine greyish clay. This clay foundation, which underlies the parish, when broken up and exposed to the air and sun, becomes loamy and ash-like, and yields good returns for the labor bestowed.

The same attention given to cultivation here, would cause double the production; and this would result from the high superiority of our soil over that of the north. Not a single State of the west can furnish to the immigrant a more kind of generous soil than is to be found in the Parish of St. Landry.

Timber.—The farmer and mechanic will find within the limits of this parish, all the qualities of timber essential to their several requirements; such as pine, cypress, oak, (several species) hickory, ash, walnut, mulberry, wild cherry, sweet gum, maple, box elder, beech, hackberry, magnolia, sweet bay, sassafras, persimmon, red elm, slippery elm, crab apple, dog wood, red and black haw, &c. This list comprises all the varieties of timber essential to fencing, building, and mechanical purposes.

Products and their Yield.—This region produces sugar cane, cotton, potatoes (both Irish and sweet) corn, tobacco, pumpkins, turnips, beans, peas, millet, rye, peans-nuts, sorghum, broom-corn, and barley, wheat and oats have been tried with

north as St. Landry.

This can be made a pleasant country for white people, and we want that class of immigrants. As to health, this part of the country is as healthy as Delaware or Maryland, as I know from a long residence here.

EXTRACTS FROM THE PAMPHLET.

Geographical Description of the Parish.

The Parish, or County of St. Landry, is situated in the Southwestern portion of the State of Louisiana. The area is one million three hundred and fifty thousand acres, about equally divided between woodland and prairie. The general surface is even and undulating, and pleasantly diversified with rolling prairies, streams of water, upon whose margins are found belts of good timber, between which spread out fine natural meadows, covered with luxuriant and nutritious grass. The parish may be divided into three districts:

between the eastern boundary and the line shaded with pink, on the map, is what may be termed the overflowed district.

Within this limit however, there is much valuable land untouched by water during the great freshets brought down the Mississippi river. The soil of this section is rich alluvial, producing in great abundance the staples of the South. Much of this land had been denuded of the heavy and valuable farms opened prior to the war. The levees were then in good condition, enabling the farmer to cultivate in security the soil; but owing to the impoverished condition of the country, and the unsettled state of affairs since the advent of peace, many of these places are liable to inundation at this time. The second district embraces that portion of the parish which lies between the south boundaries of Township No. 4 Ranges East and West, and the northern boundary.

In the upper part of this district, nearly all the streams take their rise; the face of the country is somewhat hilly, and covered with a dense forest of pine, oak, ash, walnut, hickory, and other valuable forest trees. Here also are found some fine Mineral Springs, which are much resorted to by invalids, and which possess great curative qualities. Here are considerable deposits of Lime-stone, from which, for home consumption, is made very excellent Lime; and a fine bed of marble, which is susceptible of a beautiful polish, and is valuable for the making of mantle-pieces, monuments, &c.

White men have tilled the soil from the early settlement of this State, and are not tilling it without experiencing any of the above evils.

One white man may easily cultivate forty acres of land here with machinery, and twenty without, under the old system, and much more by the use of the labor-saving machinery lately introduced, and from his individual exertion reap a larger return than in the western or middle States. He will not only supply the wants of his family, but have a surplus to devote to improvements and necessary comforts; and enjoy a good health, and live to as advanced a period of life as in any State or Territory on the continent.

More than one-half of the white population of this parish are engaged strictly in agricultural pursuits, and are robust and healthy as any similar number of farmers.

The production of one white man's labor, who is industrious, may be thus stated: 400 bushels of corn; 200 bushels of sweet and as many Irish potatoes; 10 barrels of rice; 5 bushels of cotton; with a full supply of vegetables, hay, &c. This statement is the actual result of one man's exertions, and may be safely taken as a fair average.

Now taking these facts into consideration, what becomes of the false theories, so tenaciously held, and so industriously scattered abroad? Should they not be thrown aside, and the truth suffered to take their place? We appeal to the experience of five hundred farmers in our midst for the truthfulness of every fact given, and do not fear contradiction in one single particular. Let all who may read this sketch reflect upon the above, and be assured that the erroneous impressions they have received are not sustained by the experience of honorable and trustworthy witnesses.

The Soil.—The soil of this parish is diversified; that within the limits subject to overflow, being rich alluvial, inexhaustible, and adapted to all the productions of the South. The northern portion of the parish can only boast a soil of small depth, easily exhausted, unless sustained by manure and rotation in crops. Being more broken and hilly it is more liable to wash, and requires more care in its management.

The soil of the middle and southern division of the parish, is fair; being vegetable mould, with a small admixture of sand, super-imposed upon a bed of fine greyish clay. This clay foundation, which underlies the parish, when broken up and exposed to the air and sun, becomes loamy and ash-like, and yields good returns for the labor bestowed.

The same attention given to cultivation here, would cause double the production; and this would result from the high superiority of our soil over that of the north. Not a single State of the west can furnish to the immigrant a more kind of generous soil than is to be found in the Parish of St. Landry.

Timber.—The farmer and mechanic will find within the limits of this parish, all the qualities of timber essential to their several requirements; such as pine, cypress, oak, (several species) hickory, ash, walnut, mulberry, wild cherry, sweet gum, maple, box elder, beech, hackberry, magnolia, sweet bay, sassafras, persimmon, red elm, slippery elm, crab apple, dog wood, red and black haw, &c. This list comprises all the varieties of timber essential to fencing, building, and mechanical purposes.

Products and their Yield.—This region produces sugar cane, cotton, potatoes (both Irish and sweet) corn, tobacco, pumpkins, turnips, beans, peas, millet, rye, peans-nuts, sorghum, broom-corn, and barley, wheat and oats have been tried with

good success. The average yield of these products may thus be stated; taking the experience of intelligent men as our guide; sugar cane, 1500 lbs. of sugar and 75 gallons of molasses per acre; cotton, 1300 lbs. in the seed per acre; corn, 35 bushels per acre; pumpkins, peas, beans and peans-nuts, give very heavy returns, but we are unable to give the precise quantities, owing to the fact that no person has ever taken the trouble to ascertain the quantity per acre.

One of the simplest treatment. One of the sure indications of salubrity of climate is found in the average of human life. This parish stands second to no county in the Union, in the number of its old people, and this has been remarked by every stranger coming here.

The Labor Question.—The topic of climate and health having been in a general discussion; the natural order of things suggests this, as the proper place, for the consideration of the above item in this outline.

At a distance, and among those unacquainted with this portion of our country, the idea is current and firmly believed, that the white men cannot perform manual labor. The reasons given are, that his physical organization is not adapted thereto—that the enervating effects of the climate destroy his vital powers—when these powers are put forth in the labors incident to agriculture; and finally, that sloth takes the place of industry, and indifference the place of energy. To such extent is this notion, it is very evident that profound ignorance of the great law of compensation is the rule; they entirely overlook the fact, that Providence, in its wise arrangement, both of the human and animal economy, has adapted each to the varied circumstances in which it may be called to act; that reason, experiment and result alike prove the contrary, and vindicate the laws of nature. The facts in the case are these:

White men have tilled the soil from the early settlement of this State, and are not tilling it without experiencing any of the above evils.

When one white man may easily cultivate forty acres of land here with machinery, and twenty without, under the old system, and much more by the use of the labor-saving machinery lately introduced, and from his individual exertion reap a larger return than in the western or middle States. He will not only supply the wants of his family, but have a surplus to devote to improvements and necessary comforts; and enjoy a good health, and live to as advanced a period of life as in any State or Territory on the continent.

More than one-half of the white population of this parish are engaged strictly in agricultural pursuits, and are robust and healthy as any similar number of farmers.

The cultivation of cotton is very similar to that of corn, with the difference that it requires more work, and more careful handling.

One intelligent and industrious white man will produce and gather seed cotton sufficient to make five bales of 400 lbs. of clean

The Middletown Transcript.

MIDDLETOWN, DEL.

SATURDAY MORNING, APRIL 23, 1870.

To READERS AND CORRESPONDENTS.—We devote much space, to-day, to a description of St. Landry Parish, Louisiana, which will be read with interest by those desirous of making investments in other States.

We have been requested to republish the recipe for the cure of chicken cholera, which appeared in our columns some time since, and which is said to be so efficacious in that disease. It will be inserted next week, and should be preserved by those who would save their chickens from destruction.

REVIEW.—We were in error, last week, in saying the bill to charter the Elkhorn and Massey's Railroad failed to become a law for want of time. The charter was passed, and also a bill introduced by Geo. Biddle, Esq. appropriating \$58,000 to said road, when an equal amount shall have been subscribed by individuals. The bill which failed was an enabling act to authorize Baltimore City to endorse the bonds of said Company. This was introduced at a later stage of the session, and failed for want of time.

We invite attention to the advertisement of the fine estate of Dr. F. C. Neale, of St. Mary's county, Md. situate on the Patuxent river, and comprising 500 acres of prime land, divided into two farms, nearly all arable. There is no better soil or climate than that for fruit culture; it is also good for grain, within a mile of a steam-boat wharf, and admirably located for the enjoyment of the luxuries of the salt water—fish, oysters, crabs, wild fowl, &c. Fruit flourishes there in its greatest perfection—peaches, pears, plums, damsons, cherries, apples, quinces, strawberries, raspberries, blackberries, grapes, succeed there admirably, and the season is ten days or two weeks in advance of this part of Delaware. Gentlemen in search of a good fruit and grain farm, with all the luxuries of the salt water, should examine that property. The grounds around the dwelling are ornamented with shade trees, flowers and shrubbery, and elevated fifty feet above tide.

How to Write for the Press.—Write plainly, especially all names of persons or places, all words not in common use, all quotations, technicalities, legal, medical, or scientific terms. Mark your sentences by proper punctuation; round your periods; and don't leave the compositor to cudgel his brain over your "pot-hooks and hangers," and to dig out your meaning from beneath the rubbish of obscure and involved sentences, and then blame the stupidity of the printer for not being able to comprehend your own. Printers generally are apt at deciphering ordinary chirography, but very few of them understand Choctaw, Esquimeau, Chinese, or Egyptian hieroglyphics. Write plainly, if you would be printed correctly. Be brief—come to the point—no circumlocution—much in little—be terse, vigorous—no surplus verbiage. There is a vast difference between writing for the newspaper press and performing the duties of the essayist or pamphleteer. The object of the latter is to amplify—of the former to condense. In a word:—write plainly, write briefly.

CANADA.—The Dominion is in arms on account of a "big scare," growing out of a rumor that the Fenians are preparing to march "over the border." General O'Neill, it appears, is actually on the rampage. He has repudiated the do-nothing Fenian Congress which recently met in Chicago, and called a council of fighting men, which assembled in New York, on Monday last. His object is to provide funds and organize an expedition at once, to join the Red River insurgents and strike a blow for the overthrow of British power in all British America. Emissaries have been despatched to the Northwest Territory in advance. Gen. O'Neill is commander of the Fenian Army, and has control of all the arms and ammunition which have been collected in considerable quantities at convenient points along the frontier. All he needs, says the New York Post, is enough to set him in motion.

When once across the border he calculates that men and money will come to his support without stint. He is popular with the brotherhood, and cannot fail to raise a large body of men. If the Red River insurgents really mean fight, and they can effect a junction with any considerable body of Fenians, the Canadians will have to do some sharp fighting to overpower them, for it is certain they would be heavily reinforced from this side, and would subside upon the country. A formidable Canadian expedition consisting of about 2000 men with two steel batteries, is to start for Rupert's Land about the 10th of May, but if the Fenians really mean business and not bluster, and Gen. O'Neill with his gallant wearers of the green, can get into position advance of the steel batteries, and secure the co-operation of the Red River insurgents, the news from over the border will be quite lively after while.

Some think, however, that the thing is only a large size bubble, which will burst into nothingness by the few bayonets.

LOCAL AND STATE AFFAIRS.

Boyd, St. Georges Hundred, Theodore F. Perry, Appoquinimink Hundred.

TREASURE FOUND.—Whilst some boys were playing in the old stone house at Carter's Ferry one day last week, a boy found in the earth a bundle of bank notes. He did not regard them as valuable and sold them at ten cents a piece. Some one who knew the value of bank notes, got hold of one of them, and it was brought to the knowledge of the heirs of Jacob Cannon, and upon investigation it was found that the boy had found the treasure in the earth for twenty-five years, and were doubtless put there by Mr. Cannon a short time before his death. As near as can be ascertained there were about eight hundred dollars in bank notes on the Farmer's Bank of Baltimore. Some of the money had been recovered, but it is not likely that all of it will be. Mr. Cannon was a wealthy merchant of Carter's Ferry, and was shot by a slave follower, Dover, about twenty-five years ago. The old desk has not been in use since his death.—*Suzee Journal*.

Fruit Farmers.—A correspondent says, "The Masons, Odd Fellows, and Knights of Pythias, are going to build a Hall at the cost of about \$20,000. The laying of the water pipe is nearly completed, we expect to have good water about July. The cost will be from sixty to seventy thousand dollars. We have some live men in this place, we are going ahead, and the notion of getting out to town is gone. Come will be again well-paired scales. The whipping-post will again be brought into requisition, and maulding sentimentalists will melt again over the fact that Delaware 'barbarity,' as of old, prepares 'stripes for the fool's back,' preferring this cheap mode of punishing her convicts, to the expensive penitentiary systems of some other States."

THE WEATHER.—"Capricious on an April day," is an expression which is used figuratively to describe the most trying weather at this season, rendering the figure a very apt one. On Friday morning, of last week, the thermometer rose to 80° at night, overcoats and fires were indispensable. On Sunday evening we had the first frost of the season. On Monday and Tuesday, a chill atmosphere with sharp winds, and on Wednesday morning, hour frost, and ice as thick as a silver dollar. The peach orchards are still bloom, and opinion divided as to whether the peach buds would be injuriously affected or not. Since then the weather has been more settled.

Resolved.—That we the Peach Growers at the Middletown meeting, who ship by Railroad to the New York market, are in favor of the adoption by the Peninsular Peach Growers' Association, of what is called the Sliding Scale of freight, that is to say, \$130 per car load of 16,000 lbs. if there are not over 900,000 baskets shipped over the road; but a deduction of \$50 every hundred thousand above that number, until it reaches 1,500,000 baskets shipped, down to \$100, which is to be the lowest price charged for the hire of a car from Dover to New York, and *pro rata*, from all other stations along the Del. R. R.

The second proposition was, \$110, and the State tax of \$5 for the hire of a car load of 16,000 pounds or 500 baskets, from Dover to New York, and *pro rata*, from all other stations along the Del. R. R.

The report was discussed by T. B. Bradford, G. W. Cummings, Elias S. Reed and R. H. Cummings in the negative, and J. P. Cochran, Sam'l Townsend, and J. A. Fulton in the affirmative.

R. H. Cummings offered a substitute for the report of the Executive Committee. Elias S. Reed moved the report of the Executive Committee be re-committed, and the resolutions adopted, which elicited considerable debate and finally resulted in the adoption of the first or sliding scale proposition of Mr. Hinckley.

The Committee on Consignments and Sales reported a proposition from the New York commission merchants agreeing that the cartage on all fruit sold at Jersey City must be paid by the purchaser, and that all fruit sold in New York, the cartage to be paid by the shipper; also all baskets lost to be paid for at the rate of 25cts. each, or new baskets furnished to the shipper.

The next meeting of the Association will be held at Middletown, on Wednesday, the 18th of May, at 2.30, P. M.

It was stated by the Peach Growers present that the prospect at present, is flattering for a large crop of fruit as we had last year. The trees are now in full bloom and uninjured.

A discarded lover, hailing from Brooklyn, N. Y. recently pursued his promised bride to the family of Gov. Randolph, at Morristown, N. J. whether she had fled to escape his importunities, and made a desperate attempt to take her life. A few months ago the lady was engaged to be married to the would-be murderer, and received visits at her father's house in Brooklyn. The father of the girl is wealthy, and was a General in the Union army during the late war. Apartments were fitted up under the paternal roof, at a cost of \$6000, for the young couple, whose monograms marked every piece of the rich furniture. Elaborate preparations were made for the wedding, invitations were sent out, and no one for a moment entertained a doubt of a marriage. Two days before the eventful day the bride was to be learned that her promised husband was a person with whom she could not consent to trust her happiness. She immediately broke the engagement, and ordered her suitor never to appear before her again, when he attempted to stab her in her father's presence. She escaped, and being again threatened went to visit the family of Gov. Randolph. Her suitor presented himself at the door of the Governor's mansion a day or two afterward, the girl gave orders to bar the door. Then he attempted to smash the door, and finally, it is said, fired upon his affianced through the window.

Resolved.—That in the opinion of this meeting one hundred dollars per car load is a fair price from Dover to Jersey City.

Resolved.—That if the said companies will reduce the freight to \$100 per car load, from Dover to Jersey City, and in the same proportion above and below Dover, and in accordance with the usual mode of charging freight according to distance, appoint an agent to receipt for all baskets and crates of peaches that may be robbed from the cars; and also receipt to the commission merchants for all empty baskets returned; and give such other accommodations that are needed at Jersey City, we will send all our peaches to market at greatly reduced rates from last year, therefore.

Resolved.—That in the opinion of this meeting the former committee appointed by the peach association of this State, to wait on the presidents of the railroad companies, should be requested to wait upon these said presidents and if possible make arrangements in accordance with these resolutions.

Resolved.—That a committee of three be appointed to present these resolutions to the Peach Growers' Association that meets at Dover, on Tuesday, the 19th inst.

Messrs. S. Townsend and John P. Cochran advocated the adoption of Mr. Townsend's resolutions, and opposed the substitute.

Charles Beaven, Esq. and Mr. Biggs supported the substitute, the latter hinting at some preference of the Railroad authorities towards the members of the Association in furnishing well ventilated cars.

Mr. John P. Cochran advised all Peach Growers to join the Association, and said that the Camden & Amboy Company were building one hundred first class peach cars.

After the 1st of May our Stores will close at 9 o'clock, p. m. instead of 8, as heretofore.

The Presbytery of Wilmington held its session in Milford, on Tuesday last.

Michael Carroll, an Irishman of this town, was taken to the insane asylum, at the Alms House of this county, on Monday last.

A strawberry festival in June, is talked of by the directory, in aid of the Library Association of this town.

When we sell for \$1.30 per bushel, here, and Corn \$1.17, we are 13 cents difference between them.

After the 1st of May our Stores will close at 9 o'clock, p. m. instead of 8, as heretofore.

The Presbytery of Wilmington held its session in Milford, on Tuesday last.

A North Carolinian has refused \$5000 for a mad stone in his possession.

Margaret Taylor, of Tennessee, is dead. She was 107 and a maiden.

MEETING OF PEACH GROWERS.

Pursuant to notice a large number of the Peach Growers of Delaware and Maryland, met in the Town Hall, Middletown, on Saturday, the 16th of April. The meeting was organized by calling Henry Clayton, Esq. to the Chair, and appointing Colen Ferguson, Esq. Secretary. Samuel Townsend, Esq. stated the object of the meeting to be to take into consideration the propositions of the Rail Roads as to the scale of freight proposed, whether to accept the offer of \$110 per car load from Dover, or the sliding scale, and to harmonize the views of Peach Growers preparatory to the meeting of the Peninsular Fruit Growers' Association which was to be held at Dover, on the 19th of April.

Mr. Townsend, after stating the propositions made by the Railroad Presidents to the Committee of Peach Growers, declared his preference for the sliding scale, and that the cartage is paid by shippers or buyers, we think the rate to be paid in the future should not exceed three cents per basket.

Mr. Townsend opposed the resolution, and Messrs. Beaven and John P. Cochran supported it, the resolution being finally adopted. After which the meeting adjourned.

HENRY CLAYTON, Pres't.

COLEN FERGUSON, Sec'y.

COLENSON FERGUSON, Sec'y.

TERMS.—\$2.00 per annum, payable in advance.
Single copies five cents.

ADVERTISING RATES.—One square of ten lines, \$1 for three insertions, and 25 cents for each subsequent insertion. One square one year \$10; six months \$6. For a quarter of a column three months \$8; six months \$15; one year, with the privilege of four changes, \$25; for half a column \$15. For a column one year, with the privilege of four changes, \$50; for a page \$100. When the number of insertions is not marked, advertisements will be continued until forbid, and charged accordingly. Obituaries published at advertising rates; Marriages and Deaths inserted free. Yearly advertisers must confine their advertisements to our own business. All letters should be addressed to The Middletown Transcript, Middletown, Del.

Office corner Main and Scott streets.

Dinah Badiner writes to the Transcript.

WILMINGTON, April 1870.

Boss—Dars bin a great fuis in dis yere place, but dat bigg Blace com out fer shuref, just as if he haddn't got a rit as any of dem white trash dat bin makin' a noise. Now I tell you, I tells my ole man to jes let em wane till we winna git our rit, an' dey won't know us bout like dey did him; wile let 'em see dat, any how; kase dey took him to de Bethel—what you tink or dat kind of place for sich dirty work—an' dat sum whilat trash, an' sum fokes dat call demselfs his friends, make him a noise by rightin' him an' gib up all his rite. Now I tell my ole master wouldn't dat hard, but how's dey make him pay for de whip to kick himself, an den put him in de papers. Bress us an' save us from such slave masters as dey! Now I say to my ole man I wish I could make one of dem fingers or hands dat you fokes make in de papers to plai at, or out, or even expell, or kick at, etc. Dey must be de kin of fokes dat would bout in de good bock dat make de poor black mens howl. My ole man says de reason is dey all belong to de royal rag. Well, I tells him dat dat is a eye dots lookin' ate an, an a bigger hand an' I can make dat will pull em all up; and den whar will dey be, an' whar will dey run to git out of de rook. DINAH BADINER.

Papal infallibility has been finally voted by the Council at Rome without opposition. The dream of Pius IX, is realized. If the doctrine it enunciates is to be pushed to absolute execution, the vigorous protests already heard from the German, French, English and American bishops have sufficiently disclosed the obstacles it must encounter. It would amount to a revolution in the spirit and methods of modern government, and draw the political and religious forces of many nations into ruinous antagonism. The Pope will probably rest content with this official declaration of his infallibility, and seek to give it a strictly religious, rather than the slightest political interpretation.—*Boston Post.*

The United States steamer Despatch is ordered to Prince Edward Island, to protect the interests of American fishermen. The iron clad Miantonomah has been ordered to Havannah, and the steamer Congress has been ordered to San Domingo. A cable telegram from England, announces that these vessels are to be "watched" by British ships in those waters.

1870. S. R. Stephens & Co. 1870.

Select Poetry.

APRIL.

Borne to us on icy winds,
But charming half their chill away,
Weeping, laughing April finds
The season sad, but leaves it gay.

Child of bleak and blustering gales,
Wed with amorous, vernal heats,
Half the time her frown prevails,
Half, her smile still repeats.

While the sun's relenting rays
Tell us of his glad return,
She decks with flowers the lengthening days,
And lays a wreath on Winter's urn.

Welcome! with the gifts of Spring,
Flecks though thy mood may be;
Whether floods or buds thou bring,
April, still we welcome thee!

Our Oglie.

The Indian Archipelago in the country of the nutmeg; it grows on trees, which continue to bear for many years like an apple. From flowering to ripening of the fruit is about seven months. The average product of a tree in full bearing is five pounds of nutmegs and one and a quarter pounds of mace. The harvest is from September to December, but a small harvest is made in May and June. The mace is an imperfect covering for the nutmeg (not the husk). The mace is flattened by the hands and laid out on mats to dry in the sun. Afterward it is dried by coal fires, and packed for exportation. The nutmegs are more difficult to dry. They are dried by fire alone for several months, like smoking meat, although without much smoke. When thoroughly dried they are packed in tight casks, lined, and smoked.

A young lady met in company a young gentleman who evidently had an excellent opinion of himself. During the conversation he introduced the subject of matrimony, and expatiated at length upon the kind of wife he expected to marry; that is, if ever he should take the decisive step. The honored lady must be wealthy, beautiful, accomplished, amiable, &c. &c. His listener quietly waited until he ended, and then completely confounded him by asking in the coolest possible manner, " And pray, sir, what have you to offer in return for all this?" The young man stammered, reddened a little, and walked away.

In a public office in a Western city the following notice may be seen: "Lost! A valuable new silk umbrella belonging to a gentleman with a curiously carved head."

If you want to sound the depths of human generosity, just ask somebody for advice. You will get any quantity of it for the asking.

New York City estimates its population at 1,000,000, of whom but 15,000 own all the real estate.

The freshet on the Savannah, Altamaha and Ogeechee rivers has put back the rice planting in Georgia for three weeks.

REGISTER'S ORDER.—REGISTER'S OFFICE, New Castle Co., Feb. 24, 1870.

Upon the application of J. RANDOLPH HOLTON, Administrator of Spencer P. Holton, late of St. Georges Hundred in said county, deceased; it is ordered and directed by the Register that the administrator aforesaid, give notice of the death of the said Spencer P. Holton, and of the Estate of the deceased, with the date of granting thereof, by causing advertisements to be posted within forty days from the date of such Letters, in six of the most public places of the County of New Castle, requiring all persons having demands against the Estate, to present the same, at the office of the Register, in which case made and provided. And also notice of the same to be inserted within the same period in the Middletown Transcript, a newspaper published in Middletown, and to be continued therein two months.

Given under the hand and Seal of [L. S.] Office of the Register aforesaid, in New Castle county aforesaid, the day and year above written. B. GIBBS, Register.

NOTICE.—All persons having claims against the Estate of the deceased must present the same duly attested to the Administrator, on or before February 24th, 1871, or abide the act of Assembly in such case made and provided.
